Disclaimer

Vizrt provides this publication “as is” without warranty of any kind, either expressed or implied. his publication may contain technical inaccuracies or typographical errors. While every precaution has been taken in the preparation of this document to ensure that it contains accurate and up-to-date information, the publisher and author assume no responsibility for errors or omissions. Nor is any liability assumed for damages resulting from the use of the information contained in this document. Vizrt’s policy is one of continual development, so the content of this document is periodically subject to be modified without notice. These changes will be incorporated in new editions of the publication. Vizrt may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time.
Vizrt may have patents or pending patent applications covering subject matters in this document. The furnishing of this document does not give you any license to these patents.

Antivirus

Vizrt does not recommend or test antivirus systems in combination with Vizrt products, as the use of such systems can potentially lead to performance losses. The decision for the use of antivirus software and thus the risk of impairments of the system is solely at the customer's own risk.

There are general best-practice solutions, these include setting the antivirus software to not scan the systems during operating hours and that the Vizrt components, as well as drives on which clips and data are stored, are excluded from their scans (as previously stated, these measures cannot be guaranteed).

1 Viz World 23.0.0

Release Date: 2023-12-12

These are the release notes for Viz World 23.0.0. This document describes the user-visible changes that have been made to the software since release 22.0.0.

1.1 Functionality Removed Or Changed

Summary	Key
Added support for inline preview when using Pilot Edge	MAPS-7488
Updated libcurl to 8.4.0	MAPS-7550
Fixed rendering bugs for labels	MAPS-7484
Subfolders now correctly inherits the permissions of the klm/folder	MAPS-7494
Improved quality of base map province borders for Iran and Afghanistan	MAPS-7551
Improved quality of base map for Brazil	MAPS-7226

6 issues

1.2 Known Issues

- Viz World Server Launcher must run with elevated privileges to launch Viz World Server as a service (MAPS-5530).
- Viz World Server must be restarted after manually scanning street data (MAPS-6275).
- Viz World Server leaks memory when targeted by a port scan (MAPS-5597).
- When editing multi-hop scenes, it is possible to select Favorites. This is not intended functionality, and it causes errors if you do (MAPS-6319).
- Styles with names including non-English letters can exhibit bugs (MAPS-5714). Workaround: Use English letters only.
- Favorites with names including the plus symbol + can exhibit bugs (MAPS-5731). Workaround: Avoid the use of the plus symbol.
- If the MapService.Service process is running, it must be manually stopped before uninstalling Viz World Client (MAPS-5902).
- Viz World Server Classic crashes when using trail ahead with slide out animation (MAPS-7608).

Copyright © 2023 Vizrt

- Viz World Server restarts when loading street data (MAPS-7606).
    - This has also been observed after data is loaded and the Streets tool is selected.
- Rendering issue (land color covers ocean) in Stereographic projection (MAPS-7609).

1.3 Compatibility Notes

Viz World 23.0.0 was tested with:

- Viz Engine 5.1.1
- Viz Engine 4.4.1
- Viz Engine 3.14.5
- Viz Pilot 8.9.1
- Viz Pilot Edge 3.0.0
- Viz Pilot Data Server 9.0.0
- Viz Trio 4.2.0
